PREPARATION

1. Shut off the power at the circuit breaker and remove existing fixture, including the crossbar.
2. Carefully unpack your new fixture and lay out all the parts on a clear area. Be careful not to lose any small parts necessary for installation.
3. Use gloves when handling trim, crystals, and glass components during installation.

MOUNTING CEILING PLATE (Fig. 1)

4. Remove the canopy screw (B) from the fixture, and remove the ceiling plate.
5. Set color temperature at this stage. The fixture can switch between three color temperatures (3000k, 3500k, 4000k), which can be adjusted to your preference using the 3CCT switch (Fig. 4) mounted on the ceiling plate. Switch will be recessed in the junction box when ceiling plate is installed.
6. Secure the ceiling plate to the junction box using the original junction box screws.
 - (i) It is recommended to use only original junction box screws or replacements provided by junction box manufacturer.
 - (ii) The side of the ceiling plate marked "GND" must face out towards the installer.

WIRING FIXTURE (Fig. 1, Fig. 2, Fig. 3)

7. Choose the number of down rods suitable for your application. Thread the fixture wires through the rods, swivel and canopy.

CONNECTING THE WIRES (Fig. 2/Fig. 3)

8. Connect the canopy, rods, swivel and fixture body. Ensure all connections are tightened. Note: Due to limited space within the canopy, shorten the wiring as necessary to make the installation easier. Make sure to identify and label all wiring properly (Fig. 3) before shortening wires.
9. Wire driver to the 3CCT switch per Fig. 3 using small wire connectors (B). Connect the driver input wires to the junction box wires as shown in Fig. 2/Fig. 3 using large wire connectors (A) provided. Ensure all wire connectors are secure. Connect the fixture's ground wire to the ground in the junction box; this will be either a green wire or a bare copper wire. After driver is wired to house wires, tuck wires carefully inside the junction box.

MOUNTING FIXTURE (Fig. 1)

10. Rotate the canopy in the direction of the arrow until it stops. Fasten the canopy in place using the canopy screw (B).
11. Install the crystal into the cooling block, align the holes, lock with the stop screws, and secure the tooth tube from the other end of the housing with a boom. Please do not use too much force to lock the attached screws; otherwise, the crystal will be damaged.
